YUKATA

The yukata is a traditional cotton kimono. Japanese people wear a yukata when they relax at home, visit a summer festival or stroll around town. Traditional Japanese inns (ryokan) or hotels in Japan provide yukata for their guests. The yukata can be worn after taking a bath and is also used for nightwear. If the weather is cold, there is a warm jacket called hoari which is also provided by the ryokan. You can wear a hoari over the yukata to keep warm. You often see ryokan guests strolling around in yukata in hot spa areas. However, in western style city hotels the yukata is only worn in the privacy of your room. Please bear in mind that the yukata and hoari are only lent to guests for the duration of their stay.

How to wear the yukata

Unlike in western clothes, the front layers of the yukata are overlapped in the same way for men as for women. Put the yukata on over any underwear and with the left panel over the right one. Fasten the obi (the belt) around your waist, cross it once before tying it in a bow. If you find it difficult to fasten the Obi, do not hesitate to ask the ryokan/hotel staff. They will be happy to show you how to wear the yukata.
