 Yōrōkeikoku Station → (0.7km) → Houei Brdg. → (1.8km) → Megakura → (2.9km) → Mt. Daifuku Observation Deck → Maple Valley → Umegase Valley (4.2km)

Otaki Castle
 This is the castle of Honda Tadakatsu, who was trusted very much by Tokugawa Ieyasu. The inside of the castle is now a prefectural museum.

Isumi railway
 You can connect to Kominato Railway at Kazusa Nakano Station and cross the Boso Peninsula. In the spring, many "Nano-hana (rape blossom)" color the train yellow.

Konjin falls
 A new sightseeing place, that waterfalls have 35 meters of height. You can enjoy "Satoyama promenade" which is about 30 minutes healing walking around the waterfall.

Kannon Brdg.
 Two arched brdg. over Yoro river. The vermilion balustrade shines beautifully on the river. Crossing the brdg., there is a Syusse Kannon.

Syusse Kannon
 It is Kannon of "Kaiun-Shorai". It is said that "Famous temples of prayer" are visited by many people. Cross the vermilion Kannon Brdg. and walk about 10 minutes.

Kominato railway
 A rustic local line running between Goi station and Kazusa Nakano station. Please note that the number of trains is small.

Suigetsuji-temple
 An old temple of Zen sect which is rare in Minami-sō. Rock azaleas and cypripedium japonicum in the precincts are brilliant.

Awamata falls (Yoro Falls)
 Total length 100 m. The most famous waterfall in Boso. There is a promenade that goes down the waterfall downstream from the waterfall. Fresh green autumn leaves are also beautiful.

Ozawamata falls
 It has become an observation course that opened up a cliff. There is a waterfall showing different expressions depending on the place to see.

Kyoei • Mukaiyama Tunnel
 Two tunnels in old and new are mysterious "two stories" constituting a tunnel with a total length of 110 meters. Now you can get in and out from the extended "first floor side".

Kobundo ato
 Approximately 140 years ago, in order to make cultivate land, Kaburai river was constructed "Kawa-mawashi" (a way to artificially make serpentine river arable), and made this trace of the tunnel. Even now, many tourists are visiting.

Kengaikyo
 Fresh green and autumn leaves over the cliffs of the Yoro Valley are wonderful. There are lots of wild plants at the roadside.

Tsutsumori maple valley
 The autumn leaves in the Boso region can be enjoyed for a long time. Around this time the high season will continue until the beginning of December of the year.

Mamenbara plateau
 It is just spectacular that as many as 200,000 hydrangeas will be bloomed in the plateau. It is about to be seen from the middle of July to the beginning of August.

Ichihara Quard's forest (campsite)
 A vast natural park covered with miscellaneous forests. Streams flow, promenades, lawn plazas, observation decks, campgrounds and others.

Mt. Daifuku Observation Deck (285m)
 A Natural forest with plants and fern growing is a Chiba's natural treasure. Shiratori shrine is enshrined at the top of the mountain. The view from the observation deck is the best.

Ruins of Hidaka Residence
 A mansion of the educator Hidaka Nobuzane who opened a school in this mountain in the Meiji Era. In autumn red leaves cover all over the site.

Umegase Valley
 You can see the most famous autumn leaves in Chiba. There are erosion cliffs called Umegase with a height of 30 to 50 m over a river width of 4.5 m and a length of about 80 m.

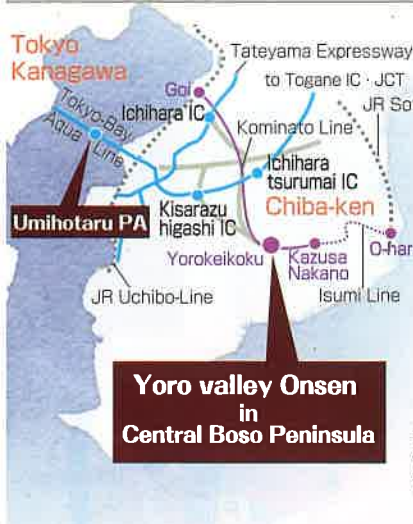

Umegase's large icicles
 In winter, the groundwater that seeps out from the ground forms a splendid ice pillar group.

Seichōji Temple
 Surrounded by old trees, it is a famous temple in Nichiren saint. A lot of sightseeing places such as a Star well made over 100 years ago.

Let's enjoy in plenty of Onsen and Nature
