Beautiful Nagatoro!
Welcome to Nagatoro!

The Historic Arai Silkworm House/ Nagatoro Town Museum

Folk material on matters such as silkworm culture and agriculture gathered mainly from Nagatoro is on display here. The adjoining Honosato Flower Garden is designated as one of the important cultural assets of Japan. The house was built 270 years ago and was a place where silkworms were raised. The house features chestnut-plate and the shingle roofing is supported by oak beams.

Mt. Hodo (2467m)

Its elevation is 497 meters. It boasts azalea in spring, fresh vegetation in summer, red leaves in autumn, and winter sweet and plums in winter. You enjoy a view of the Chichibu city and Chichibu mountain range in the Mt. Hodo summit. Mt. Hodo has 900 meters directly west of Nagatoro station. It takes about 30 minutes to walk. You can wash to top of the mountain in around minutes by using a cable car. There are also paths to the top. It takes around 5 minutes to reach the top of the mountain on foot.

Hodosan Small Animal Zoo

It is a zoo for small animals on the top of Mt. Hodo. This zoo cares for a variety of small animals such as the Japanese monkey and the spotted deer. You can feed the monkeys on Monkey Mountain. It is quite exciting to watch the monkeys catch the food you throw to them.

Hodosan Jinja Shrine

Hodosan Jinja shrine was built in the year 1046 AD on the top of Mt. Hodo. The worshippers visit the shrine to pray for protection against disaster, theft, and happiness. The stone statues of the shrine’s main building are spread out in beautifully colored.

Nagatoro Iwadatami

Nagatoro River (川伏)

It gets down from Arakawa which flows through Nagatoro with a Japanese-style boost. You can enjoy the gorgeous river valley all the while being tied down the powerful rapids by the boatman’s skillful paddling and taking in the view of the natural monument, Nagatoro Iwadatami.

Nagatoro Iwadatami (岩岳)

This is a natural monument of Japan. Rocks up to 80 meters wide and 90 meters long can be seen along the Arakawa River. The formation resembles a list laid out laterally, hence the name Iwadatami which translates to taking out of rocks. You can enjoy the beautiful formation created naturally by changes in the earth’s crust and erosion from the river.

The Saitama Museum of Natural History (自然の博物館)

A collection of various fossils, rocks, minerals, and animals are on display here. Fossils of an extinct giant shark and the rare "palaeospondylus" are the must-sees.

The Seven Flower Temples of Nagatoro (قدردزهت ميتساگي)

The seven flowers of autumn are Japanese bush clover, Japanese pampas grass, ammctor, trumpet vine, golden liris, boronia, and balloon flower. These five-hundred flowers have been admired by the Japanese for generations and are featured many times in the famous poems of the Manpaku anthology. Each of the seven flower temples displays one of these flowers. Walking these temples is the perfect way to tour the town while taking a walk or a bicycle ride.
