Feel a Sustainable Life Food and Nature Around Nagato and Mukatsuku Peninsula

Yamaguchi

This tour revolves around 2 people with careers in Tokyo who decided to return to their hometown, Nagato, and start a new life. One contributes to developing the local fishing industry and outlining stable production and supply. The other enjoys life at it simplest, farm, eat, and play while living of nature.

✓ Blowfish Breeding Farm

A fish farm that includes blowfish, flounder, and the rare ocean eel. Hear about the techniques and skills used to breed in sea water while observing places not usually accessed by the general public. You're sure to feel the passion of the young workers of the local sustainable fisheries industry.

✓ Motonosumi Inari Shrine

123 red torii gates line the path leading to the blue ocean. A wonderful scenery showing the beauty of Japan, this location was chosen as one of CNN's "Japan's 31 most beautiful places." Visit here on the way to Hyakusho-an of Yuya Bay.

✓ Salt Factory and Healthy Vegetarian Lunch

Hyakusho-an's concept starts with a self-sustaining lifestyle. After visiting a salt factory that uses a deep plowing technique rarely found in Japan, enjoy a vegetarian lunch full of homegrown seasonal vegetables.
