

Free Translation Services

Need some help to speak in foreign languages?

Here are two excellent apps for machine translation services.

“NariTra” and “VoiceTra4U” are free speech translation apps best suited for travel-related conversations. Try them !

NariTra

Provided by Narita Airport

Features

- It can translate between English, Chinese, Korean, Indonesian and Japanese.*
- It can be used inside and outside of Narita AirPort.

*It can also translate between French, Spanish, Thai and Japanese text.

Find “NariTra” at App Store or Google Play and install it on your smart phone.

- You need iPhone or Android phones with a connection to wifi, 3G, or LTE.
- For more information, visit the website <http://www.narita-airport.jp/jp/fun/app/naritra/>

VoiceTra4U

Provided by U-STAR

Features

- It can translate between 27 languages including English, Chinese, Korean and Japanese.
- It can manage conversations between up to 5 persons at any one time.

Find “VoiceTra4U” at App Store and install it on your smart phone.

- You need iPhone or Android phones with a connection to wifi, 3G, or LTE.
- For more information, visit the website http://www.ustar-consortium.com/app_ja/app.html

There are some tips for use on the reverse.

Attention

- When using these apps, you are responsible for telecommunication fees. Be aware that international roaming costs may vary. Please be advised to use free wifi to avoid this.
- All data from speech and text input, as well as translation results, profile and location data will be recorded in the U-STAR server. U-STAR may use this data for future upgrades in the speech translation technology and development.
- You use these services at your own risk. Neither Narita Airport nor U-STAR have any obligations regarding any damage caused by these services.

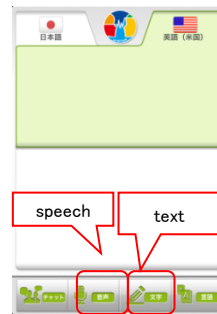

How to use VoiceTra4U

VoiceTra4U has two modes for use.

'Single Mode' is used when speaking to one other person.

'Chat Mode' is used to chat with multiple devices (up to 5); face-to-face or remotely.

Single Mode

Input either by speech or text. To input speech, tap the 'Mic' icon at the bottom of the screen. Tap 'Finish' when you're done speaking.

The recognition result and the translated text will be displayed. Tap the 'Language' icon at the bottom right to switch languages.

Chat Mode

Add friend/friends you wish to chat with from your contact list and tap the 'Call' button. Chat will begin as soon as your friend responds to your call.

Input speech or text and it will automatically be translated and delivered to your friends.

All person joining the chat session should install "VoiceTra4U" on their own smart phone before starting to chat.
