**Tokyo Area**

B: Complex (shops, restaurants, event space and apartments)
C: This complex was built in 2006 along a 250-meter section of Omotesando street, and blends in with the natural surroundings. However, its construction aroused controversy, since the building replaced the Dajunkai Aoyama Apartments built in 1927, which symbolized revival after the great Kanto Earthquake of 1923 in the Omotesando area. The destruction of the old apartments raised questions about Japan’s commitment to preserving historic buildings, and there was resistance from local landowners who were concerned that Ando’s buildings were too fashionable for the area. However, Ando created a gentle spiral over the new building to provide barrier-free access to the shops that line it. There is a garden on the roof of the apartments, and the building is kept low to match the row of Keyaki trees that stand along Omotesando street. A part of the Dajunkai Aoyama Apartment still remains in Omotesando Hills.

Tokyo Area
A: The National Art Center, Tokyo (2007) (国立新美術館)
B: Art museum, museum shop, restaurant and café
C: This is the largest national museum in Japan and it was built for exhibiting art, collecting art information and popularizing art. The concept is a "museum in the forest." The entrance lobby is in the 21-meter high atrium, where there is a ticket counter, information desk and lockers. The see-through elevators, escalators and stairs lead to foyers in front of the galleries. The restaurant and café located in the upper part of the atrium offer views of the garden greenery, atrium and foyers. An auditorium (capacity: 350 persons), an art library, a lecture room and galleries are located on the third floor which also has a courtyard.

Saitama Area
A: The Museum of Modern Art, Saitama (1982-) (埼玉県立近代美術館)
B: Art museum
C: Received the 24th Business Construction Association Prize (BCS Award) in 1983. The art museum is located within a park, and with its overall height much suppressed to blend in with the trees in the boulevard. It is a piece of architecture that presents a symbiosis with nature and the park. The interior of the museum is illuminated by the natural light coming through the clerestory windows located on top of the central atrium. The structure of the building is a lattice-like beams-columns construction.

Admission: Sightseeing and study tours are not allowed.

Okayama Area
A: Nagi Museum of Contemporary Art and Library (1994) (倉敷市現代美術館・図書館)
B: Art museum, Library
C: Known as “The third generation art museum that presents architecture and exhibition pieces unified in a semi-permanent state” or as “The Meditation Space” built to accommodate exhibition pieces that are not to be shown in conventional art museums. Thus it is said to be a piece of architecture that evolved from the joint creation of art and space of the artist and architect, an art museum born of the joint effort of both the architect and the artist; so to speak. The southern wing of the building, which is separated by the central courtyard, is used as the community library for Nagi-cho citizens.

13 Tokyo Area
A: Hillside Terrace (1969–) (ヒルサイド テラス)
B: Mixed use apartment, commercial complex building
C: It is said to be a design that manipulates a whole street instead of a stand-alone building. The geometrical shape of the building, coupled with a pure white wall composition, leaves a great impression. Starting off with the Danish Embassy (designed by Fumihiro Maki), the public spaces, serene living quarters, creative shops and offices, are each intertwined with playfulness to create a very unique space. Its size has continued to grow over the past 30 years or so and is still growing.

16 Tokyo Area
A: Mikimoto Ginza 2 (2005) (ミキモト金沢2)
B: Pearl boutique, fashion jewelry, cosmetics salon, cafe and restaurants
C: The unique windows of various shapes with pearl-pink walls attract massive attention even in Ginza. The owner is Mikimoto, a long-established pearl jewelry shop in Japan. The motif of the windows is the foam that pearls breathe in the sea and falling petals. The appearance tempts one to look into the shop with a sense of expectancy and mystery, like a jewelry box.

17 Kumamoto Area
B: Museum
C: To blend in with the rich natural surrounding, the space between the exhibition room on the 1st floor and the access road in front is designed with small green fields. The entrance hall is amplified with the
provision of a glass facade, and the storage spaces are tucked away like flying-saucer-like rooms floating in the air. The overall design emphasis is on the humane scale of the environment, with attention paid towards reducing the unnecessary hidden “heaviness” the building has on its natural surroundings.

Tochigi Area
A: Nakagawa-machi Bato Hiroshiige Museum of Art (2000)（那珂川町馬頭広美術館）
B: Museum
C: The concept is a traditional calm façade suitable for the Ukiyo-e (woodblock prints) of Hiroshiige Andoh. This one-storey house with a gabled roof blends in with the natural surroundings of Nakagawa town. It features a lattice wall made of Yamiyo cedar and an interior design with Washi paper and Ashino stone which are special products of the town. The gentle light filtering through them creates an expressive feel.
