Captain of the Tourist Caravan
Yamanashi, Home of Mt. Fuji
Mt. Fuji opens to climbers on the Yamanashi Prefecture side on July 1. A ceremony marking the start of the climbing season is held to pray for the safety of the climbers and the tranquility of Mt. Fuji.

Ohachimeguri
Walking around the crater of Mt. Fuji is called Ohachimeguri. Enjoy the spectacular view of the enormous crater and the greatest panoramic view in Japan as you walk around the crater.

Climbing Mt. Fuji
Mt. Fuji, A Sacred Mountain

Let's climb Mt. Fuji!
For advanced climbers ★★★
Mt. Fuji is Japan’s highest mountain standing at 3,776m. Mt. Fuji has long been a symbol of Japan and was registered as a World Cultural Heritage Site in 2013. The view from atop the highest point in Japan will become something you will cherish forever. Come climb Mt. Fuji.

Aim for the summit of Mt. Fuji, the highest mountain in Japan!

Sunrise
Watching the sunrise from atop Mt. Fuji is an awe-inspiring experience. You don't have to be at the summit to be able to enjoy this awesome sight.

Concierge

Concierge
Makita Sports
A musician and actor born in Yamanashi.
Guidelines for Safely Climbing Mt. Fuji

The drastic difference in temperature and atmospheric pressure between Mt. Fuji and ground level can lead to life-threatening conditions like altitude sickness or hypothermia if you’re not careful. Ensure that you are fully prepared before ascending the mountain.

Make a climbing plan with adequate leeway
Because a large number of climbers are aiming to reach the summit, the trail just below the summit can get congested around dawn.
If you are planning to ascend and descend the mountain in a single day during daytime, make sure to begin climbing from the fifth station early in the morning.

Refrain from bullet climbing
Bullet climbing means climbing to the top of Mt. Fuji through the night without taking time to rest. Lack of sleep can cause fatigue and lead to altitude sickness. It’s best to stay in one of the mountain huts and give yourself some leeway while climbing.

Reservation necessary for overnight stay in mountain hut
Although many mountain huts on Mt. Fuji are in business during the climbing season, as huts get crowded with climbers, it’s best to make advance reservations if you want to stay overnight.

Fujisan Conservation Donation Campaign
In both Yamanashi and Shizuoka Prefectures, donations to the Fujisan Conservation Donation Campaign are requested to help efforts in keeping Mt. Fuji beautiful for future generations.

Amount: 1,000 yen or up (Children and people with disabilities are asked to donate what they can)
Payment method: Pay by cash at Fuji Subaru Line 5th Station, Yoshida Route 6th Station Campaign Period: During the climbing season from July to September

Climbing equipment rentals
Climbing equipment rentals are available for climbers who need or are unsure about what equipment to take.
● Full Mt. Fuji climbing set: approx. 12,000 yen

Mt. Kai-Komagatake
UNESCO Eco Park
Minami Alps
Standing at 3,193m above sea level, this lofty peak is Japan’s second highest mountain following Mt. Fuji. Boasting lovely alpine flowers including the indigenous Callianthemum, and animals such as ptarmigans and Japanese serows, the park represents one of Japan’s most remarkable natural environments.

If you’re lucky, you might encounter a ptarmigan!

The natural environment of Mt. Kitadake is magnificent!

The charm of the Minami Alps
The Minami Alps is the largest mountainous area in Japan with mountains exceeding 3,000m above sea level. The rich natural environment is home to and protector of rare plants and animals. The park was registered as a UNESCO Eco Park in 2014. It is a treasure house of magnificent scenic beauty and nature that you can experience with your senses.

Comprised of the three mountains, Mt. Jizogatake, Mt. Kannondake, and Mt. Yakushidake, this area features a fantastic view of varied scenery throughout the seasons and a popular hiking course that stretches across the mountain range.

Mt. Yatsugatake

Mt. Yatsugatake is a generic name for several of the mountains in the area. With Mt. Akadake as the highest of the peaks, Mt. Gongendake, Mt. Amigasa and other peaks make up the Yatsugatake peaks. There are several routes suitable for novice to experienced climbers which is another attractive feature of Mt. Yatsugatake.

**Mt. Akadake** For advanced climbers ⭐⭐⭐

Soaring 2,899m above sea level, Mt. Akadake is the highest peak of the Yatsugatake peaks. The name of Mt. Akadane stems from the reddish-brown color of its facade (aka is the Japanese word for “red”). Enjoy the spectacular 360 degree panoramic view from the summit. You can see Mt. Fuji from the top of Mt. Akadake.

**Doryu no Taki Waterfall**

With a vertical drop of 30m and spanning 15m in width, the Doryu no Taki Waterfall in the Kawanagawa Valley is a delicate waterfall that flows like silk thread from between the rocks.

**Higashizawa Ohashi**

Offering one of the most stunning views in the Yatsugatake highlands, the red bridge against Mt. Yatsugatake creates a beautiful contrast.

About Yamanashi Prefecture

Yamanashi Prefecture is situated in the center of Japan. Located next to Tokyo, almost 80% of the prefecture consists of mountains and forests, and it is famous for its rich natural scenery.

The local topography is known as the “Kofu basin,” being completely encircled by mountains. Mt. Fuji, which towers over the land to the south, is Japan’s highest peak, a distinctive symbol of Japan, and listed as a world heritage site. To the north is the Yatsugatake mountain range with the Kiyosato Highlands at its foot. To the west is the Southern Alps, a mountain range listed as a UNESCO Biosphere Reserve (also known as a UNESCO Eco Park in Japan), with some of Japan’s greatest mountains, including Mt. Kai-Komagatake and Mt. Kitadake, its second-highest peak.

The climate of Yamanashi includes large temperature swings between summer and winter; thus, the prefecture undergoes distinctively visible changes between the four seasons. Fruit cultivation thrives by making use of the climate’s temperature range.

Yamanashi has also been famous since ancient times as a source of rock crystals, and it produces more jewelry than anywhere else in Japan thanks to its superior grinding techniques.
