This is the start of the Kitano Foreign Residences. At that time, over 100 houses were built. The Kitano area exemplifies Kobe’s western influences and attracts many visitors from across the country. Over twenty buildings are on display, including the Weathercock House and Moegi House, designated as important national cultural properties. At the Kitanomachi-kobo, or Kitano workshops, visitors can purchase local items as well as experience making them. Himeji Castle

Himeji Castle was the first Japanese site to be registered as a UNESCO World Heritage site in 1993. Qualities such as the unique structure of the castle and the beauty of its white plastered walls earned it the nickname White Heron Castle. Its well-preserved towers and the structures surrounding the castle have mainly kept their original form, and have helped the castle earn its excellent reputation. It has been about 400 years since the castle was first built, and it is a storehouse of numerous national treasures and important cultural properties.

Approach to the Main Keep

- **Entrance of the Main Keep**
  The entrance consists of big double-door-style, outer one is covered with plaster and inner one is covered with iron plate. This construction avoids fire as with storehouse (Japanese traditional construction). The entrance connected to I passage turret (I Watari yagura) has double-door-style as well.

- **Sliding doors on stairs**
  Some sliding or wooden doors are attached on the stairs in the main keep. These doors have function in prevention of fire spreading.

- **Window in the gable**
  There is a gap under the gable window in the gable, which shows each component used to which part.

- **Effective use of the base**
  The difficulty of castle construction is to build a high architecture on stone wall because it is very difficult work to pile random-sized stones and make the surface even and rectangular. The base is needed here. Correcting the gap and roughness of the stone wall by timbers used for the base makes the construction easier since the pillars are set vertically on an even and rectangular surface.

To learn more about Himeji Castle...

Amazing facts about Japan's greatest castle!

- The castle has never been damaged by war.
  Himeji city was an important military site during World War II and the city was heavily attacked and a large part of the city was destroyed during the war. But miraculously, the castle was not damaged. It's the largest castle in the country that has kept its original structure.

- There are many traps around the castle.
  The paths to get to the main tower have quite a few twists and turns, making it very difficult to reach the tower. Even the gates themselves are very small so that only one person can go through at a time.

  1. The Hishi-no-mon gate to the I-, Ro-, and Ha-no-mon gates seems like the shortest route to the castle, but it is actually a roundabout way.
  2. Going through the Ru-no-mon gate is the shortest route, but there is a hole in the stone wall nearby, called the Uzumi-mon, which is a trap that can send landslide through it and block the Ru-no-mon gate.
  3. Standing at Ha-no-mon, the main tower looks extremely close, but if you continue on that path, it will take you away from the tower.
  4. Although the path between Mizu-no-nimon and Mizu-no-sammon is the correct way to the main tower, the path between these two gates is a downhill slope built on purpose to make intruders think they’re going the wrong way.

- Stone walls that even ninjas cannot climb.
  The walls at Himeji Castle are built in the shape of a fan, meaning the walls aren’t built straight, but they are built with a curve so that ninjas can’t climb up from the outside wall.

There are more interesting facts at Himeji Castle.

Take your time to explore and learn about the castle. There is more than meets the eye in the magnificent structure.

Even ninjas can't climb this stone wall!

Sake

Japanese Sake: Refined over its long history

Japanese sake has a history of about 2,000 years. Sake from Hyogo has always been considered to be one of the very best in the country, especially the varieties made in Nada Gogo area. This area has the following qualities that allow them for the production of great tasting sake.

1. Miyamizu water from Mt. Rokko is ideal water for creating sake.
2. Local large and high-quality rice is perfect for sake brewing.
3. There are many master sake brewers from the nearby Tamba region.
4. A cold front called Rokko-oroshi that blows down from the mountains creates the perfect condition for sake brewing.

All of these factors helped create amazing flavor, therefore this area is considered to be the area that produces the best sake in Japan. Water wheels were introduced that allowed for finer refinement of rice, and the fact that the area is close to the ocean helped with distributing the products. These are all part of the reason why the area was able to produce top-quality sake that is loved by people all over Japan.

Japanese Sake Scale

On the back label of Japanese sake, there are numbers with + and – signs. This shows the amount of sugar in the sake. For sake, a negative number means it’s sweet, and positive number means it’s dry.

How to Enjoy Japanese Sake

Sake can be enjoyed chilled, warm, or at room temperature, which makes it very unique. The flavor changes depending on the temperature. The flavor of sake also changes as it ages, becoming milder.

The Power of Sake

Since the old days, sake brewers were known for their beautiful skin. Sake has anti-oxidants which work for anti-aging and skincare. Sake lees, a by-product of producing sake, are also known to have a high nutritional value.

Japanese sake and wine

Sake is perfect for paring with food as wine. Although sake is made from grains and wine from fruit, both are made through fermentation, and can be enjoyed with food. Unlike wine, you might need some time to relish sake at first. That’s just like how people start off liking white wine, before moving on to red. Sake is much milder when compared to wines, which are more acidic with strong fragrances, so it goes well with any dishes. Try the Daiginjo before a meal to fully enjoy the fruity and delicate flavor. Sake can make dishes taste much better, so just like wine, be sure to think about what sake, and when and how it will be served.

Free tasting events in sake breweries are great opportunities to learn about sake while actually tasting it. You’ll learn to love sake once you learn all the stories surrounding its production. By trying different sake, you’ll find the one that’s right for you, so visiting breweries with sake-tasting is a fun and interesting activity!
